

 elica

Elica 2021

4D LIVING EXPERIENCE

COME ON IN AND DISCOVER ELICA'S FOURTH DIMENSION.

The versatility of the functions ranging from light to extraction and cooking translate into models with an innate wow factor. Taking the product apart to discover its diversified inner workings and accessories, each one essential for its operation, gives you the opportunity to get a much more comprehensive view of the object.

The quality of the materials, the attention to detail, the passion for the design, captured in their essence, become the key features which transmit an emotion.

The exact emotion that represents the fourth dimension of Elica products.

FRAME AND DISCOVER

ELICA
IS SURPRISE AND PASSION,
INNOVATION AND TRADITION,
INTUITION AND COURAGE.

Every day, we work to satisfy and surprise our customers with solutions that bring together design, experience, reliability, know-how and style.

We began life in Italy in 1970 and grew up in the world. From the very beginning, we applied the principles of Italian design to our kitchen hoods and we used the most innovative technological tools. Over the years, we have revolutionised the image of hoods and the Elica brand has become a household name worldwide.

Our evolution has led us to explore the field of cooking with surprising solutions, conceived from an intuition, a change of perspective that led to the creation of the NikolaTesla line of aspirating induction hobs, winner of numerous international awards, including the renowned Compasso d'Oro ADI.

Today, attention to detail, the expert use of the best materials and an artisan approach are the hallmarks of our offer and translate into ranges in which the perfection of industrial production is combined with extensive artisan experience, to create one-of-a-kind products capable of surprising and thrilling.

All our innovations are created with one purpose: to amaze, thrill and make our customers happy.

PRODUCT FEATURES

PRODUCT FEATURES

SUCTION

CONNECTIVITY

With the increasing widespread diffusion of the IoT world, it has become common practice to manage all your devices with a wi-fi connection. We can now control our extraction hood with the dedicated Elica app or through voice control to turn it on or off, adjust the extraction speed or intensity and the colour of the light, simply with a click or the help of the most popular vocal assistants. The app also becomes a useful tool for maintaining the product, thanks to periodic notifications which report on its status, any cleaning operations required or filters that need replacing

COMFORT SILENCE

With the widespread tendency to design open-plan kitchens joined to the living room, it has become important to be able to rely on hoods with a greater extraction capability which are quieter, so they do not intrude on the surroundings. Thanks to Comfort Silence, the sound level of Elica extraction hoods at maximum extraction speed does not disturb or interfere with the conversation of those present.

SUPER EASY INSTALLATION

With the exclusive Elica system, installation can be done in total safety in just a few steps, safeguarding the look of the product and the space in which it is positioned. After the hood is automatically locked in position, the fastening points can be finely adjusted to preserve the linear design of the kitchen and ensure perfect integration of the hood in the room. A simple, hard-wearing and safe solution.

SPECIAL MATERIAL

In the quest for attractive products to show off but which have a functional, everyday use, materials play a key role. They can make the difference by becoming an attractive signature feature or by disappearing into the background and by being easy to maintain in the long term. They are fundamental in the process of innovation, forming the basis of an attractive look and a fulfilling user experience. Elica selects materials in which sturdiness, easy cleaning and aesthetic impact are combined in a perfect balance. The wide selection of finishes available offers maximum freedom of choice whatever the setting.

BACK ASPIRATION

There are now more ways of installing your extraction hood. On models with this function, it is possible to rotate the conveyor and directly connected the hood with the outlet in the wall behind it or in other models, the special architecture of the product allows the wall outlet to be created with a 90-degree elbow pipe. Thus, you can rely on maximum extraction while preserving the original outward appearance of the product which will not be modified by pipes or additional visible flues.

TOTAL INTEGRATION

The total look trend is becoming increasingly popular in kitchens now, guaranteeing a uniform, linear design with respect to the space. The Total Integration products have been designed to be seamlessly integrated into the kitchen whilst maintaining harmony with the surroundings.

SUCTION

LONG LIFE FILTER

To ensure the best performance and long-term duration of your hood, the traditional filters must be replaced every 3-6 months. To simplify the maintenance operations, Elica has designed the innovative, regenerable Long Life odour filter which lasts up to three years. Just wash it with hot water and neutral soap or in the dishwasher at 65° and dry it in the oven at 100° for ten minutes every two months to keeping it looking good as new. The level of efficiency is about 60%.

LONG LIFE FILTER ++

Long Life Filter ++ is the innovative filter studied by Elica for maximum performance. This filter guarantees efficient filtering in excess of 80% against a market average of around 60%. This odour filter can be regenerated and lasts for up to a maximum of three years, thus avoiding frequent and wasteful replacements. To maintain these characteristics, the filter must be regenerated every two or three months in hot water and neutral soap or in the dishwasher at 65° and dried in the oven in the oven at 100° for ten minutes to keeping it looking good as new. The perfect solution if you like trying out challenging dishes which take a long time to cook.

AIRMATIC

Now, thanks to Airmatic, your extraction hob area is completely automatic. The smart sensor can distinguish between the quality of the fumes and type of cooking and combine this information with the number and power of the induction hob areas being used. Even when the hob is switched off, the system automatically adapts by gradually decreasing extraction and eliminating any residual fumes and odours. This advanced technology is top of the range in the world of extractor hobs and allows you to obtain the best balance between silence, power and energy efficiency.

AUTOCAPTURE

With Autocapture, you will not have to worry about adjusting extraction based on what you are cooking. The hood will identify the cooking areas that are active and set the power accordingly, finding the best balance between silence, power and energy efficiency. And when you have finished cooking, the system gradually decreases the speed, eliminating any residual fumes and odours. The extraction hob becomes even more functional and practical for perfect cooking and excellent extraction.

SUCTION

MULTI-D CAPTURE

If you like a challenge when cooking and need highly efficient extraction capabilities, Elica has developed the Multi-d capture solution. The extraction is divided over multiple areas to guarantee the best fume capture capability. The fluid dynamic system allows you to increase the extraction speed by suitably sizing the surfaces through which the air passes. This guarantees a high cooking fume-capture efficiency through an increase in the negative pressure along the outside of the product.

EASY TO MAINTAIN

Keeping your hood clean not only ensures maximum hygiene in the kitchen but also long life for the product. The Elica models are designed with materials and finishes for instant maintenance operations. All the components, such as the grease and odour filters, can be easily accessed and removed so they can be washed or rapidly replaced.

DIM LIGHT

The light in the kitchen, as in any room, is a key design feature for improving the home living experience. Achieving the right intensity becomes fundamental in creating the desired atmosphere. Which is why Elica has designed the Dim light function which allows you to adjust the intensity of your extraction hood light with a simple control. Maximum light for the best visibility on the worktop or dimmed when relaxing.

TUNE WHITE

Lighting in the home should not be static because different tones of light are called for depending on the time of day: cool light is excellent for cooking while warm light creates a more relaxing mood. The Tune White function allows you adjust the LED colour from warm white (2400 k) up to cool white (5000 k). With Tune White, you can also align the colour of the light from the hood with the rest of the lights in the room for a uniform atmosphere throughout.

AIR PURIFICATION

ELICA AIR PURE

MULTIFUNCTION

Ikona Maxxi Pure incorporates a hood and air purifier in a single product. The product has been cleverly designed to separate the hood module from the air purifier without compromising on performance and usability, and to make them work efficiently and independently. A “2 in 1” product designed to improve the air quality without the need for additional devices or complex monitoring systems, often invasive and disagreeable.

PURE SILENCE

The air purification is extremely discreet, in Silent mode the sound level of 33 dBA is imperceptible, comparable to the sound level of a library. The Elica system works without any noise pollution, creating a comfortable environment in your kitchen-living area.

COMBO PURE FILTER

The air purifier, fitted with a special combined HEPA and carbon filter, captures particles as small as 1 micron, freeing the space of unpleasant odours, allergens such as dust, animal hair, pollen, mould, pollutants produced by household cleaning agents, paints and coverings.

COOKING

KEEP WARM

If you make lunch and dinner in one go, if you just need to reheat a dish or if an unexpected event means you are late getting home, Elica offers the practical Keep Warm function which keeps dishes that have just been cooked warm. The Keep Warm function can be enabled for any cooking area.

TIMER

Forget about cooking times by turning on the timer. Just set the minutes and start the countdown. At the end, the cooking area will be automatically switched off and a beeper will sound. You can set independent timers on more than one area at the same time with the touch remote control.

POWER LIMITATION

If Power Limitation is set during installation, the maximum power absorbed by the product is limited, thus ensuring that you never exceed the pre-set limit. So you can cook efficiently with no interruptions in total safety.

COOKING

MULTI FLEXI SPACE

Lots of large pans on the stove together? With the Multi Flex Space system, you have more space available both in length and width when using large pots. You can slide the pans from one ring to another without lifting them thanks to the closed cross grids which create a flat, continuous surface. A practical cast iron worktop ensures that everything you need is always at hand.

DUAL BURNER

With Dual Burner, having small or large pans is not a problem. The innovative burner features a double crown with independent ignition of both burners, so perfect for both a small mocha coffee and a big pan.

BRIDGE ZONE

When you cook using longer or large pans, there is a risk that the heat is progressively dispersed on the surface of the pan from the centre outwards. The Bridge Zone function solves the problem by joining two cooking areas into one single larger area. With the same power, uniform and constant temperature for the best result of your dishes.

TEMPERATURE MANAGER

On a daily basis, we often prepare our own signature recipes as well as standard dishes. The Temperature Manager function is an excellent tool for optimising times. Just start one of the three pre-set programs (42, 72 or 92 degrees) with a simple, intuitive button and start cooking your more delicate dishes, such as mousses or sauces, reheating dishes or boiling water. No wasting of time and maximum efficiency.

STOP & GO

Sometimes you need to unexpectedly leave the kitchen in the middle of preparing a recipe, interrupting the cooking. In this case, if you enable the Stop&Go function, all the active areas can be switched off with a single gesture, saving whatever is being cooked.

PAUSE

With Pause&Recall, you can switch off all the cooking areas with one single gesture and then, restart them with a simple press of a button at the same previously set power, combining safety, cooking result and multi-tasking management.

POT DETECTOR

It is easy to see where to position the pot on the induction hob. With Pot Detector, the hob automatically detects the presence of the pot on the cooking area and provides heat only when it is correctly positioned.

CHILD LOCK

If you have children in your home, the Child Lock function is invaluable for ensuring the cooking or extraction areas are not accidentally switched on. The function can be enabled when the product is switched on but the cooking areas and extraction are switched off.

ELICA CONNECT

THE ELICA CONNECT RANGE, DESIGNED TO MAKE LIFE EASIER

Elica is at your service in your everyday life and has created a range of connected products controlled by smartphone or via the vocal assistant which fit in seamlessly with the style of your kitchen, thanks to their innovative design. Avant-garde technical solutions have been developed to simplify everyday tasks, the ones with which you take care of yourself and your family, but take up your time and energy. If want to protect the air in your home, Elica Connect does it for you and you can concentrate on enjoying your free time, in total relaxation, with no worries.

All just one click away

Elica Connect is a simple and intuitive application that can be downloaded in a matter of seconds. After registering the product on the app, you will be granted access to a world of services designed to make your daily routine easier, at home, far away from home or wherever you are. From viewing the filter status to the remote operation of your hood, as well as the guide to maintenance and much more.

What you can ask your vocal assistant

Your vocal assistant allows you to switch the hood extraction on and off and to select the preferred speed. You can also adjust the intensity and tone of the light. Following your instructions, it will set the lighting based on the atmosphere you want to create; intimate and relaxing or adapted to a kitchen workbench where every detail must be clearly visible.

What you can do with the Elica Connect app

CONFIGURE THE LIGHTS

You can adjust the intensity and power of the hood lights in just a few seconds, modulate the temperature of the LEDs from warm to cold light, aligning the lighting of the hood with that of the room to create a uniform atmosphere throughout.

ADJUST EXTRACTION

In addition to switching the extraction system on and off based on your requirements, it is possible to adjust the extraction power of the hood, even remotely. Your hood switches off when you decide thanks to the timer function. You can use the default adjustments or customise the timer functions. You can ensure excellent performance in terms of extraction and noise levels by selecting the Silent function. Chat with your friends or watch TV while you are preparing your next dish.

TAKE CARE OF THE FILTERS

If the efficiency of your filters falls below the minimum threshold, an alert will notify you that it is necessary to clean, replace or regenerate the filters in your hood to guarantee the best performance and clean air in your home. The "How to" section provides you with a step by step guide on how to remove, maintain and reinsert the filters in your hood, including the steps on how to clean them. If your filter needs replacing, the app will take you directly to the Elica Shop where you can find all the filters that are compatible with your hood model. From here, with just one click, you can purchase and conveniently receive the filter, accessory or eco-friendly cleaning products in your home.

RECEIVE SUPPORT

Contacting us is easier and faster with the Elica Connect App. Elica support will be instantly on hand to solve the problem by giving you clear suggestions on how to proceed. You can also forget about paper documents because everything you need is in the Elica Connect App, from the warranty to the use and maintenance booklet. You can consult it whenever you want to without losing a second of your time.

TESLA ASPIRATION SYSTEM

NIKOLATESLA

Cooking and extraction, dependability and style are the added elements that create a unique product. The broken-up view highlights the refined materials that characterise the NikolaTesla range: the cast iron grilles and black glass, combined in a refined and linear design. The result is a unique overall vision for a product where technology and innovation, design and elegance are showcased in perfect harmony. The intuitive change of perspective features downward extraction, resulting in a highly-innovative product.

WHY CHOOSE A NIKOLATESLA

Harmony and simplicity

A love of cooking is now expressed through an accurate design of the kitchen space and a careful choice of accessories. Extractor hobs are the solution for anyone who prefers a design with clean lines and open spaces where vertical volumes disappear, making way for an overall streamlined look.

According to recent market research, we are opting more and more to join the living room and kitchen areas, so we can prepare lunches and dinners in a social setting that does not cut us off from the rest of the house. To achieve this, we seek out electrical appliances which make our lives easier and guarantee maximum functionality when preparing food; appliances that discretely disappear once turned off thanks to their attractive exterior design which blends seamlessly into the background.

Eclectic and complete

The NikolaTesla range of integrated extractor hobs is Elica's answer to demand for style, performance and ease of use. But it doesn't stop there. NikolaTesla is the solution for anyone whose aim is to conjure up an emotion in the kitchen as well. The emotion of being amazed. The emotion of outdoing yourself with ambitious recipes and not having to worry about the fumes. The peace of mind of being to install and use the product with the greatest of ease. The pleasant surprise of being able to clean it quickly and easily. The enjoyment of using an extraction hob every day that seems to have been tailor-made for your home. An avant-garde inner technological unit, designed to provide the best extraction and cooking performance, is showcased in a sophisticated designer product, manufactured from hard-wearing materials with carefully crafted finishes. The NikolaTesla range consists of unique models, suitable for any requirement: the clean design of Switch; the integration of the scales in Libra and the use of gas in Flame, while the compact 60- or 70-cm size of Fit is added to the Prime, One and Compasso d'Oro models to produce an eclectic and complete range.

OPERATION AND MAIN ADVANTAGES

Quality of air has always been key to Elica's products, incorporating the very best technology in hobs for intelligent, high-performance, downdraft extraction of fumes and of odours.

BEST EXTRACTION SPEED

All the NikolaTesla models provide a very powerful extraction speed of 5.1 m/s. They can capture all the fumes and odours before they start to rise. This feature makes these products unique in terms of efficiency and performance.

MORE SPACE FOR DRAWERS

The product design has been studied to optimise the internal spaces of the cabinet. The adjustable and positionable rear pipe, which sits flush to the back of the cabinet, makes room for deeper and more spacious drawers. The result is greater a surface area, unobstructed by the worktop, which can be used to store food or kitchen utensils.

SMART SENSORS AND THAT'S ALL YOU NEED TO KNOW

The innovative Airmatic function involves the use of smart sensors which are able to detect the quantity and quality of the fumes produced and to set the most suitable extraction power accordingly.

SELF-ADJUSTING EXTRACTION

With Autocapture, you can concentrate on your recipe and leave the hood to automatically adjust based on the number and power of the hobs being used.

FAST AND EASY TO CLEAN

The smooth, seamless surface of NikolaTesla is one of the innovative features of the new generation of Elica extraction hobs. The seamless ceramic glass is an efficient design detail that also makes short work of cleaning.

PRACTICAL MAINTENANCE

Beauty is combined with practicality when it comes to maintenance as well. The system, patented by Elica, allows the filters to be removed from above while the internal compartment can be washed in total safety, thanks to the opening in the glass that blends in with the aesthetics.

INTUITIVE AND USER-FRIENDLY INTERFACE

Elica extractor hobs feature a simple and intuitive interface to allow you to enjoy the pleasure of cooking every day. The touch control panel allows the cooking areas and hood to be controlled separately and, in standby mode, it becomes totally invisible. Controlling cooking has never been so easy and convenient.

IMPROVED ODOUR FILTERING CAPABILITY

This is why the NikolaTesla range, in the filtering version, features a filter with a high odour purification capacity, capable of reaching filtering thresholds over 82% compared to a market average of 60%. And to guarantee extremely easy maintenance, the filter can be regenerated for up to 3 years.

NikolaTesla has been designed to fit into many different types of kitchens. In the standard filtering version, NikolaTesla is equipped with every component needed for installation, including the exclusive chrome-plated profile that finishes the air outlet hole at baseboard. In the aspiration version, pipes are supplied as accessories and users can choose the best configuration, based on the architecture of their home. It is possible to install NikolaTesla directly against the countertop (standard) or inserted in a slot, blending in with the countertop. (Filotop).

NIKOLATESLA LIBRA / ONE / PRIME / SWITCH

NIKOLATESLA FLAME

* Recommended filotop dimensions: for different tolerances, respect the actual dimensions of the glass.
FOR FURTHER INFORMATION, CONSULT THE PRODUCT INSTALLATION MANUAL.

IN THE BOX

NikolaTesla includes everything it needs (in the standard version) for being installed in both aspiration and filtering version. Possible configurations, and related components included in the packaging, are mentioned below. For any other installation needs, bends and pipes are available as accessories.

NIKOLATESLA STANDARD
DUCT-OUT MODE

NIKOLATESLA STANDARD
FILTERING MODES

Thanks to the selection of accessory pipe fittings, your NikolaTesla can be configured in the way that best suits your needs.

By opening the cove, you can remove the three batteries of the high performance ceramic filter (regenerable) and empty the liquid collection safety compartment, which is the only component that can protect the motor in case of leakage of cooking liquids.

By removing the grid, you can easily reach the aluminum grease filter thus performing easy cleaning.

The drain valve guarantees cleanliness also in the case of abundant overflow of liquids.

NikolaTesla has been conceived to guarantee maximum installation flexibility, in order to best use the cabinet internal spaces, thanks to a movable rear piping, which can be positioned close to the back, allowing for the use of deeper and more spacious drawers.

88x51x21 cm
84x48,7cm (cut)
Duct-out/Filtering
Black glass + cast iron, grey glass + cast iron

The first gas down-draft extraction top. The cast iron elements of the top are designed to combine aesthetic appeal and functionality with the utmost safety. The closed cross and flat grid supports guarantee stability with pans of any size and ease when moving on the cooking area. The cast iron filter cover doubles as a practical work surface. The wok support, available as an accessory, increases the cooking variations on NikolaTesla Flame.

Excellence in small spaces

Small spaces are becoming more and more widespread in homes now which is why multifunctional products, capable of optimising space, are excellent solutions.

Designed to meet the exacting needs of those unwilling to renounce excellence even in small spaces, NikolaTesla Fit is the first induction hob with integrated extraction that can also be installed in 60-cm wide base units with an overall surface area of 60 or 72 cm.

Elegant and functional design

A return to the origins of the essential induction hob where the surface is continuous and in standby mode. A slight pressure on the central part activates the extraction in a perfect combination of style, comfort and functionality. The compact dimensions and shape have been designed to leave space in the cabinet and total freedom of movement on the hob with pans of any kind. The heart of this efficient and silent extraction unit is totally concealed by the glass top which covers the product discretely and elegantly.

Simple cleaning and maintenance

NikolaTesla Fit is designed to be really easy to clean and maintain. The fully linear ceramic glass surface makes cleaning very quick and easy. The central aesthetic element can be removed and washed. It is also the access point for extracting the filters and carrying out maintenance. The inner compartment can be accessed in complete safety and any excess liquid can be removed thanks to a special drain valve underneath.

Full installation flexibility

Nikolatesla Fit has been designed to adapt to the most varied installation configurations. These are the main examples of the infinite range of possibilities that can be developed using the available piping on the following page.

* The pipes are available as accessories

Recommended filotop dimensions: for different tolerances, respect the actual dimensions of the glass.

FOR FURTHER INFORMATION, CONSULT THE PRODUCT INSTALLATION MANUAL.

ARCH & LIGHTAIR

We live by intuitions, which become the starting point of every project and which represent the meeting point between the designer and user. It is design that gives life to these intuitions, which are transformed into products able to express themselves in intuitive ways, and continuously surprise with unexpected functions. Arch & Lightair products blend into the room's architecture, but at the same time become the protagonists themselves. They are the synthesis of vision, technology, and creativity.

Furnishing multi-functional spaces

Innovation is sensing change and imagining tomorrow with ideas and solutions that improve people's experience of life. Open Suite is a unique product, capable of occupying space in a new, unexpected way and of offering previously unseen functionality. The extractor hood becomes part of a system made up of elements that interact and, together, offer infinite furnishing solutions in which light is the star.

Shapes, materials, and light in an innovative, modular solution

In settings in which the furniture in the living area plays an essential role, Open Suite is the perfect ally. Its modular, customisable structure, with a unique style, is immediately recognisable and adds character to the environment. The latticework is painted in soft touch black and the extractor opening features cast iron effect grids.

MODULAR DESIGN

Open Suite offers several functions: not only a hood but also light and a wide choice of shelves. It comes with four pre-set configurations (island 80cm and 160cm, wall 80cm and 160cm) that can be both a complete solution and the base from which to add accessories. The wide choice of available elements and finishings include glass shelves (clear and smoke), black metal and metallic mesh, wood (walnut or customisable), but also extractor modules and additional light panels to increase the extraction power or expand the light point across the work surface. In the island version, the height of the structure is adjustable to allow installation inside any environment, regardless of the height of the ceiling. Create your own unique version of Open Suite by playing with spaces and recreating lines and geometries according to your personal taste and the style of your furniture.

Functional and evocative light, a genuine piece of furniture

Light is one of the distinctive features of Open Suite: whilst the new installation solution effectively and silently eliminates smells from the environment, the large LED panel, powerful and efficient, ensures uniform lighting, that can be adjusted in intensity and colour temperature. This is how Open Suite becomes a strategic light point when preparing food, but also ambient lighting creating a great atmosphere for any occasion, always in perfect harmony with the surrounding space. The illuminating surface is maximised and perfectly optimised, both in the base 80cm solution and in the larger solutions equipped with additional LED panels.

ELICA CONNECT

Wifi connection

Designed to ensure the greatest freedom of movement in the kitchen, in addition to the front-positioned ergonomic controls, Open Suite is part of the line of Elica Connect intelligent hoods. Using voice commands or the Elica Connect app, you can turn the product on and off, adjust its extraction power, and modulate the intensity of the light. The App also lets you monitor the efficiency of the filters and to seek any sort of assistance with just a few clicks.

Open Suite in the box

Thanks to the available accessories, you can create an unlimited number of arrangements based on the structure of your environment and your needs, starting with the two base versions that can be ordered in the catalogue.

SOME ARRANGEMENT IDEAS FOR ISLAND SOLUTIONS

Accessories and modularity

Both for the island version and the wall version, starting from the two base products, you can choose to customise the height of your Open Suite, adding or replacing shelves.

You can put together the Open Suite that best fits your environment, even creating wider versions by adding - through the latticework connectors - hood modules, light modules or shelves.

The motor of the hood and purifier can be activated from a dedicated interface and operate alternately to each other. The chimney, available as an accessory for filtering and duct-out versions, can be installed above the hood motor, either on the right or left.

Wellness in your own home: style and pure air.

Today, the kitchen and living are a single space where we spend much of our day, in which we seek comfort and wellness through harmonious and elegant furnishings, pleasant lighting, the absence of annoying noises, but above all, the purified air that we breathe. With this in mind, Elica has created Ikona Maxxi Pure, a valuable aid in ensuring the right balance of the air quality in the living area, which will become part of your daily routine.

A multifunctional product that looks after indoor air

Ikona Maxxi Pure incorporates, in an elegant furnishing, a hood and air purifier that take twofold care of the home's air. It has been designed to improve the quality of domestic air without needing to install additional devices or complex monitoring systems which are often impractical and invasive. Ikona Maxxi Pure has been designed to allow the hood and purifier to operate independently, without compromising on either performance or usability. The "hood core" of Ikona Maxxi Pure efficiently eliminates cooking fumes and vapours. Alternatively, by activating its purifier, the air in the living area can be freed of allergens and pollutants, providing an effective aid in combating allergy symptoms and breathing ailments tied to the presence of chemical agents, offering a sense of well-being and tranquillity all throughout the day.

Super-silent air purification

Ikona Maxxi Pure is able to completely purify the air in a 30m² space in just 20 minutes. The air purifier is fitted with a special combined HEPA-carbon filter and can capture particles as small as 1 micron. It has two operating modes: "Boost" for intensive air cleaning, and "Super Silent", perfect for silently purifying the room, working in the background.

COMBO PURE FILTER (HEPA-CARBON)

The special Combo Pure Filter, a combined Hepa and carbon filter, captures polluting agents, freeing the living area of unpleasant odours and allergens such as dust, animal hair, pollen, mould, and harmful residues produced by household detergents, paints and coverings. To maintain the efficiency of air purification, the filter must be replaced more or less once per year. Ikona Maxxi Pure will remind you to change it through an alert on the user interface to ensure the air you breathe is always healthy.

A design that adapts to any living space

The timeless design of Ikona Maxxi Pure perfectly adapts to any open space area. The product is available in soft black matt or stainless steel finishes. It can be installed in a recirculating or duct-out version, suspended or wall-mounted. The attractive flue, available as an accessory, can be positioned exclusively above the hood on the right or left.

WALL MOUNTED

A mixture of materials, placed alongside one other, to create wall-mounted hoods with a powerful extraction unit, designed to guarantee multidimensional extraction. A linear design, with vanishing points that enhance its verticality, drawing the eye up like the natural rise of the extracted fumes. Wood, like porcelain stoneware, steel and black glass, are materials that have been selected to create this attractive and functional range of hoods to enjoy every day. Conjuring up emotions.

Harmony and simplicity

The aesthetic linearity can be seen in the cast iron effect aluminium grilles, which strongly characterise the product. They are easy to remove and are equipped with a blocking system designed to avoid accidental falls. The proposed materials and continuous surfaces allow fast and efficient cleaning, even after more intense cooking sessions.

Metric visions

Thanks to the sizes in which it is proposed, Haiku is perfect for a range of design solutions. It is available in both a wall-mounted version (32, 60, 90 and 120 cm) and island version (32, 120, 180 cm), in both an extractor and filtration version.

Shift 3238 system - the only system with adjustable depth

Elica was the first in the market to propose an innovative wall-mounted bracket system in Haiku SHIFT 3238, thanks to which installation operations have been largely simplified. Haiku can be positioned either in line with the shelves or in such a way as to increase the work space on the hob. SHIFT 3238 allows the millimetric adjustment of the hood body depth. Limitations simply disappear and aesthetic solutions multiply, as do the advantages of cleaning operations.

Super Plat heightens the user's sense of freedom, offering more time to concentrate on cooking thanks to the smart wireless system. The hood can be used either through the Elica Connect app or with a smart speaker, giving and receiving information.

Unique combination of form and material

The new Super Plat model is a hood characterised by simple and modern lines. It's a response to the demand for an electrical appliance, which, despite remaining true to its identity, perfectly blends into the style of the kitchen where it's installed, without interrupting the continuity of forms and surfaces. Its design makes it perfect for installation either as a stand-alone or between cabinets. It offers broad flexibility of use: it is originally a recirculating hood, but with the addition of stylish flues can easily be transformed into a duct-out version. Super Plat is available in black or grey glass, combined with cast iron effect elements to make it a genuine feature item in the kitchen.

Wi-Fi connection ELICA CONNECT

Thanks to its Wi-Fi module, Super Plat is always connected to a cloud at your service. Using the Elica Connect app, you can control the extraction speed, all light functions and even monitor the product's status. The app provides you with access to tools that help keep your product running clean and efficiently over time. What's more, Super Plat can be connected with the most popular smart speakers so you can control it with your own voice.

Top performance

Super Plat exploits Elica's Multi-d Capture technology: extraction is no longer concentrated in one specific zone but rather distributed across the entire perimeter of the front surface. As such, the extraction capacity reaches the highest levels and is able to guarantee excellent results in terms of clearing the air of unpleasant vapours and smells. Despite its powerful motor, Super Plat is extremely quiet even at the highest speed thanks to the Comfort Silence technology, which reduces the noise level during use of the hood in all household situations.

Easy to clean

Super Plat is designed to make standard cleaning and maintenance operations simpler, faster and safer for the user. The absence of any visible mechanical parts when the front panel is opened greatly simplifies maintenance operations: users have direct access to the inside of the product and are free to move without any obstructions. The grates are easy to remove for total sanitisation.

Stand-alone or integrated thanks to adjustable depth

Today's kitchens, dominated by clean and essential lines, require flexible design concepts able to maximise space. Hence Rules was born, designed to be in harmony with the kitchen project. This new model guarantees a completely customisable solution thanks to the innovative system allowing millimetric modulation of its depth during installation. When reduced to the minimum thickness of 21 cm, Rules becomes a stand-alone and almost disappears into the wall; when the depth is increased to 36 cm, it perfectly aligns with cabinets of any depth. The dimensions of Rules are the same as those of standard cabinets with height 36 cm, allowing complete integration with all kitchen compositions.

A tailor-made outfit

A broad selection of available finishes, designed to bring out the best in every space. The version in black glass dresses the product with a minimalist and elegant design. For those looking for total integration with their kitchen furniture there's the naked version, which can be clad with the same door as the cabinets, thus totally concealing and disguising the product among the kitchen cabinets. For a more determined hood there's the version in black DEKTON® Sirius, designed to recreate a total look in the kitchen. A durable, resilient material that's easy to maintain, adding a sophisticated and modern feel to every space.

Easy to clean

Rules comes with patented tilted grates, which thanks to their special structure, capture drops of condensate and convey them to a collection tray. When deep cleaning is required, the water tray can be removed and sanitised without the need for any tools. The linear design of Rules makes it extremely easy to clean. All the finishes can easily be treated with water and a neutral soap. By simply removing the grease filter, it's possible to reach the inside of the hood to service the filters.

CEILING

We want a home that reflects who we are, in which every single accessory is an expression of ourselves. from the coloured cable to the atmospheric light. We want solutions that surprise us and surprise others.

Elica ceiling hoods are the solution that can discretely disappear into the ceiling or become a key lighting feature. An architectural and lighting project that combines the best extraction technology with an intelligent use of light in the home.

A NEW POINT OF LIGHT AND VIEW

The latest interior architectural projects have seen the gradual shift away from traditional kitchens in terms of just a room, in favour of an open-space solution included in a living area. This change of layout has also revolutionised the design of electrical appliances which have benefited from a major transformation in terms of aesthetic and functional design.

In a setting in which significant importance is placed on the perfect integration between all the elements which furnish a single area, light becomes paramount in guaranteeing balance and uniformity to spaces. The overall vision thus becomes fluid and seamless.

Elica ceiling extractor hoods are designed to integrate seamlessly into the surfaces in which they are inserted. In the sophisticated models on offer, light plays a fundamental role in the overall architectural project. The illuminated panels outline the space, creating not just personalised atmospheres, but imperceptible aerial volumes which can become a signature feature in the room or blend discretely into the ceiling when not in use. Like real windows in the ceiling, Elica hoods provide exceptional extraction performance and the best lighting possible through the use of dimmer lights and the Tune White function which allows the colour of the light to be adjusted based on personal tastes and requirements.

The ceiling range consists of products with a high technological and aesthetic value: Hilight, with its elegant and modern design; Illusion, the paintable solution which gives the illusion of disappearing into the ceiling; Skydome, with its clean, discrete lines featuring signature large illuminated panel and Lullaby, an authentic architectural project featuring material and light which stamp their mark on the kitchen.

S.E.I. SYSTEM

Thanks to the patented Super Easy Installation system, just a few simple steps are all that it takes to complete the safe installation of the hood without affecting the false ceiling.

Bring the product to the compartment in the false ceiling.

Push the product into the practical opening.

Tighten the screws to definitively fix the product.

The brackets hold the product in the false ceiling

Available for models: Illusion, Skydome, Hilight Glass and Hilight-X.

SPACE-SAVING INSTALLATION

H30 INSTALLATION

H16 INSTALLATION

The powerful extractor fan is integrated in the false ceiling and ensures an excellent level of fume extraction. Designed to be installed anywhere, Elica ceiling hoods adapt perfectly even to lower ceilings. They are, in fact, available in two heights, 30 cm and 16 cm.

LIGHTING ACCESSORIES

Elica ceiling hoods are fitted with high-intensity LED lights. The luminosity and white tone can be adjusted on all the models depending on the time of day or personal requirements. A colder light is perfect when preparing meals while a warmer light is just what you need to create an intimate atmosphere during dinner.

And if the watchword is customisation, then Elica has come up with a series of light accessories to enhance the products with cables in different materials, from fabric to copper, as well as a variety of additional bulbs.

Just like a real ceiling light, the hood can also be controlled with a wall switch or a remote control which can be attached to the wall with a handy magnet.

To avoid the formation of condensate and the flowback towards the source of air output, we advise installing this component along the outlet pipe, taking care to position it horizontally to ensure correct operation.

The accessory must be installed on the motor if there is an INLINE remote motor unit.

SUSPENDED

The elegance of the light is combined with powerful extraction units to produce attractive eye-catching hoods. Hoods that become spectacular ceiling lights that not only furnish the kitchen, but guarantee the best air treatment, thanks to the latest generation of filters. The skilful use of materials allows it to fit seamlessly into any environment and yet, make a statement: from the sophisticated and luminous glass, perfect for elegant and refined spaces, to the polished copper or rust finish, ideal for an industrial look. Unexpected points of light, for a wow factor.

DOWNDRAFT

The discretion of clean lines and finishes that disappear into the countertop, lying flush to the surface on which they are designed, is the hallmark of Elica's downdraft hoods. An up&down mechanism ensures high extraction performance when the hood is switched on, which then disappears into the countertop when turned off, ensuring a linear and streamlined kitchen design.

The remote motor means the harmony in the kitchen remains undisturbed by the noise of the powerful extraction unit. For maximum comfort.

Understated, minimal style

The new Getup model enhances the classic downdraft style and cutting-edge technological solutions which ensure the utmost comfort in the kitchen. It stems from the demand of those aiming for a minimal setting, but one that is also focused on efficiently removing vapours and odours in the home.

Total installation freedom

Getup blends discretely into any type of kitchen, leaving total freedom for installation and taking up a minimum amount of space inside the unit, thanks to its size and the position of the extraction unit which allows for deeper drawers.

The motor, included in the box, can be assembled on-board or on both sides of the product, with the option of turning the outlet in four directions to meet any installation requirement. The same extraction unit can also be installed remotely (up to 3 metres), freeing up space inside the unit whilst maintaining efficient performance and low noise levels.

Original solutions

Materials have always been one of the fundamental elements for Elica in the innovation process, resulting in statement solutions, in line with trends in the furnishing sector. In Getup, the black finish is interpreted with a combination of black glass and details in soft touch paint while the classic solution in steel showcases its timeless elegance.

The cast-iron effect is a brand-new addition: highlighted by a titanium trim, the subtly bright finish blends in perfectly with new kitchen styles and the aesthetic elements of the gas hobs. The “naked” model allows you to cover the upper panel with any texture, even the same one as the worktop, making Getup a one-of-a-kind, customisable product.

Smart interaction and Wi-fi connection

ELICA CONNECT

Interacting with Getup is surprisingly natural. The innovative user interface is always on view and all the functions can be selected with a touch on the side part of the product, so you don't have to reach over pans or the hot stove, ensuring complete safety.

Getup comes with Wi-fi: extraction and lights can be controlled via the dedicated App and widely-used smart speakers. Using the Elica Connection App, it is possible to receive useful feedback on filter maintenance and the best ways to use the hood.

BUILT IN

The traditional concealed installation allows you to create a uniform and seamless environment, with no interruptions. For anyone looking for maximum alignment and total linearity, built-in hoods are the solution to stamping your own style on the kitchen. The perfect fit between the wall units allows for continuity, concealing the technology behind the extraction unit inside the hood. The innovative no-drip, anti-condensate system ensures the best protection for the wall units, capturing the drops of rising steam before they are dispersed in the air. Discrete and sophisticated allies.

Even built-in hoods connected to the Web, starting now

ELICA CONNECT

Hidden 2.0 @ is Elica's first built-in hood with Wi-Fi connection, a model distinguished by its extremely clean design, allowing its smooth and complete integration into your kitchen design.

Through this product, Elica continues its journey through the IoT world, making life in the kitchen even simpler: Hidden 2.0 @ allows greater freedom of movement and more time to concentrate on your cooking.

The hood can be managed through the Elica Connect app, using which it's possible to adjust the intensity and warmth of the light, whether cooler and more elegant or softer and more inviting, thus perfectly creating your desired atmosphere.

The dedicated and extremely user-friendly app updates the user with helpful information regarding the status of the product or any necessary servicing, such as filter maintenance or replacement. Moreover, Hidden 2.0 @ can be connected with the most popular smart speakers for access to voice control.

SMART SPEAKER
VOICE CONTROL

ELICA CONNECT
APP CONTROL

Huge performance in a space-saving solution

Hidden 2.0 @ is designed to guarantee best performance in the smallest possible space. Its reduced overall size in fact allows use of the cabinet space regardless, useful in storing jars or recipe books.

The hood becomes an integral part of the space and guarantees best performance also thanks to a perimeter extraction system, which perfectly captures the fumes.

A LED strip illuminates the hob with diffused and even lighting, and allows adjustment of the light intensity and colour, from cool white to a warmer shade, ensuring the perfect atmosphere and best visual comfort at all times.

Linearity
in the kitchen

Hidden 2.0 @ is designed to disappear into the cabinet. The central panel in either glass or steel hides the functional elements of the product while maintaining a clean look and perfectly blending in with the cabinet. The result is a totally linear kitchen effect without any discontinuity, perfect for lovers of an understated and essential style.

Excess condensation and steam will no longer be a problem

When using an induction hob, the formation of condensation is common. Drops often fall back down on the hob or into pots and can ruin the cupboards. The ample profile in stainless steel protects the door of the cupboard. The innovative resistance element in the hood's body heats the profile and lamp support to 42°C, reducing the temperature difference between the steam and the metal surface. Thanks to the grids the condensation water is easily collected in a specific tray located on the bottom. To empty it, you only have to press a simple button. The controls are ergonomically positioned on the front of the profile, making them easily accessible and ensuring maximum comfort.

Functions and details in steel with a professional look

The ergonomic and functional design of the profile, combined with patented grids, allows you to achieve exceptional results in terms of fumes collection, for clean and healthy air.

With Boxin No Drip, ergonomic design and functions are in perfect balance. The carefully studied profile measures 14 cm and has a 45° opening radius, representing the perfect angle and distance for channelling the fumes through the grease filter, improving its performance and speed of extraction. Thanks to the special patented grids, the few drops of condensation generated get trapped between the slats of the grids and then conveyed to the water collection tray located at the bottom.

Easy to clean

The condensate collection tray should be emptied and cleaned at least once a week or more frequently, depending on the use of the hood. Place a container under the hole in the crossbar, press the tab down, and proceed with the flushing. Condensation residues may remain inside the tray. To eliminate them, you can easily remove the back crossbar, without the use of tools, so that you can wash it completely.

GOOD TO KNOW

For those of you, who like to keep up with the latest trends and are not just looking for an attractive finish, but also want detailed information about functionality, we have created a section in which you can source all the details on accessories, useful information, advice on how to choose your hood, warranties and energy labels.

REMOTE CONTROLS

The Elica radio control, designed by Fabrizio Crisà, is super thin, resistant and practical, thanks to the magnets that allow it to be placed on metal object. It comes in glass and aluminum, in black or white.

White

KIT0121468

Black

KIT0121469

ALLOWS YOU TO TURN ON THE **AMBIENT LIGHT**. HOLD DOWN FOR A LONGER TIME TO ADJUST THE BRIGHTNESS OF THE LIGHT.

RECHARGEABLE BATTERY WITH MICRO USB PLUG. (CORD INCLUDED).

THE **+** KEY INCREASES THE ASPIRATION **POWER**, WHILE THE - KEY DECREASES IT. BY HOLDING DOWN THE LATTER, THE HOOD SWITCHES OFF REGARDLESS OF ITS CURRENT SPEED.

THE **LIGHT** ABOVE THE **HOB** IS SWITCHED ON BY LIGHTLY PRESSING THE KEY. BY HOLDING IT DOWN FOR A LONGER PERIOD, YOU CAN ACTIVATE THE ADVANCED FEATURES, ACCORDING TO YOUR MODEL: THE DIM-LIGHT (THAT ADJUSTES BRIGHTNESS) OR THE TUNE-WHITE (THAT ALLOWS FOR THE VARIATION OF THE LED LIGHT TEMPERATURE).

ODOUR FILTERS

Charcoal filter

The traditional odour filter, made up of a mix of activated carbons, loses its efficiency through use and has an average life of 3-6 months.

Regenerable charcoal filter

The Regenerable Charcoal Filter has the same characteristics of the HP Regenerable charcoal filter, but with a filtering efficiency that ranges from 40-60 %.

HP Regenerable charcoal filter

Odour filter with very high efficiency level >82%. Capable of regenerating itself and of lasting up to a maximum of 3 years in comparison to standard filters. To maintain such characteristics, the filter must be washed every 2 or 3 months with hot water and mild soap, or in the dishwasher at 65°C. and can be dried in the oven for 10 minutes at 100°.

Ceramic odour filter

The ceramic filter is a modular charcoal filter that can be thermally regenerated in the oven every 2/3 months at 200° for 45 minutes, up to max 5 years. It allows for very high odour absorption efficiency and very high mechanical strength.

GREASE FILTERS

Aluminium Grease Filter
KIT0010805

Available for
ADÈLE / ADÈLE ISLAND /
BLOOM / BLOOM-S / JOY
/ MAJESTIC NO DRIP /
MISSY / STRIPE

Layered aluminum grease filter (GFA). This filter is the most common on the market, also because, thanks to its size it can be easily washed by hand, or in the dishwasher.

Buffle Professional Filter
KIT0010804

Available for
ADÈLE / ADÈLE ISLAND /
BLOOM / BLOOM-S / JOY
/ MAJESTIC NO DRIP /
MISSY / STRIPE

All steel grease filter that gives the product a typical industrial hood look. Thanks to the labyrinth of steel layers, this filter has a high grease capturing capacity.

Professional Stainless Steel Grease Filters
KIT0010806

Available for
ADÈLE / ADÈLE ISLAND /
BLOOM / BLOOM-S / JOY
/ MAJESTIC NO DRIP /
MISSY / STRIPE

Grease filter with the first layer in steel and a microperforated back metal sheet, easily washable and with high grease capturing capacity.

LEARN MORE ABOUT WEIGHT

In kitchen designs featuring an island, suspended or ceiling hood (built into a false ceiling), it is important that the plasterboard structure is able to support the weight of the hood itself.

The weight varies depending on the model and overall dimensions, and the following table is a useful aid in developing a suitable support without needing to forgo a practical and stylish open space.

	PESO NETTO WEIGHT
ADÉLE ISLAND	29,00 Kg
CLOUD SEVEN (DUCT-OUT)	17,70 Kg
CLOUD SEVEN (FILTERING)	19,50 Kg
EASY UX	11,65 Kg
EDITH	19,25 Kg
GALAXY ISLAND	24,50 Kg
HAIKU ISLAND (32 cm)	33,70 Kg
HAIKU ISLAND (120 cm)	46,30 Kg
HAIKU ISLAND (180 cm)	55,10 Kg
HILIGHT GLASS (H16)	29,10 Kg
HILIGHT GLASS (H30)	30,90 Kg
HILIGHT GLASS (NO MOTOR)	24,80 Kg

THE IMPORTANCE OF THE HOOD IN THE KITCHEN

The extractor hood is an essential tool in the kitchen, helping to improve air quality and maintain a healthy environment. Combustion fumes, unpleasant smells, odours and cooking vapours are, in fact, both annoying and harmful not only for people, but can also deteriorate furniture and walls. It is, therefore, important to ensure effective, easy-to-use and silent extraction that can eliminate them, leaving the kitchen more hygienic and cleaner.

With its eclectic function, the hood is now used not only as a basic extractor unit, but also as a light source to illuminate the hob, to create softer atmospheres or as an authentic furnishing accessory. The numerous models and finishes available on the market allow you to customise the space according to the design of your kitchen and individual taste: whether it is minimal and linear or a statement, signature piece, the hood today has become a central element in our kitchens.

WHICH HOOD SHOULD I CHOOSE?

It can be difficult to find the best choice among the many models on offer. To find the hood that best suits your space, personal taste and lifestyle, you should consider several key factors: correct extraction power, type of installation and kitchen design. For the best air removal performance, the hood must offer the right extraction power. Take a look at the size of your kitchen and your cooking habits. With a simple calculation, it is possible to define the ideal flow rate for each room: just multiply the room volume by 10. Ease-of-use and silence are another two important variables that will help you achieve the best user experience.

The type of installation is essential in narrowing the field and finding the category you need for your kitchen.

BUILT-IN

The hood is built into the cabinet, disappearing from view.

WALL-MOUNTED

The kitchen is positioned against the wall with the hob adjacent to the wall. Wall-mounted hood.

ISLAND

The kitchen is positioned in the centre of the room with the hob away from the wall. Ceiling-mounted hood.

CORNER

The kitchen is laid out between two walls of the room and the hob is positioned close to the corner. Install the hood between adjacent walls.

CEILING

The kitchen is positioned either in the centre of the room or against the wall. The hood acts as both a light and extractor and is installed in the false ceiling.

DOWNDRAFT

The hob is positioned away from the wall, on a peninsula counter or in the centre of the room. Install the hood directly on the top.

SUSPENDED

Install the hood on the ceiling, suspended like a pendant light.

EXTRACTOR HOB

The hood is integrated into the hob. Extraction from below

HOW IS IT INSTALLED?

Perfect hood operation is ensured by correct installation, guaranteed by specialised personnel. Assembly and maintenance vary according to the two types of hood: extractor and filter. Many Elica models are designed to work in both versions.

Before starting installation of your hood, bear in mind these simple, basic rules:

- Follow all the steps indicated in the instruction booklet;
- Connect the extractor hood to the outside using a dedicated pipe with a diameter of 120-150mm: a shorter length and the absence of bends guarantee the best performance.
- Respect the minimum distance from the hob indicated in the booklet to avoid damage to the operational parts and protect personal safety;
- Ensure that the location of the electrical outlet is close to the product for connection;
- In case of difficulty, request the intervention of a specialised technician.

FILTER HOOD

The filter hood eliminates fumes and unpleasant odours via dedicated filters and returns clean air to the kitchen. This type of hood is suitable in situations without no external evacuation hole.

EXTRACTOR HOOD

The extractor hood expels the air outside the home. It is the most common type as it guarantees high performance, high flow rate and minimum noise.

MAINTENANCE

To ensure that your hood lasts for a long time and continues to work correctly, the first step is to keep the filtering system in tip-top condition.

Filter hoods feature two types of filter:

the grease filter which removes the grease from the air dispersed during cooking and the odour filter. Both must be regularly cleaned and replaced to ensure the very best performance.

- The grease filter protects your hood by trapping grease particles. The grease filter can be made of aluminium or stainless steel and requires periodic cleaning by hand with a neutral detergent or in the dishwasher at a low temperature (*), or alternatively in a paper version. In this case, it must be replaced every month based on use.
- The odour filter with activated carbon, installed on filter hoods, captures and traps odour particles in the air. Remember to replace it every 3-4 months. Long-life odour filters, on the other hand, last longer. They can, in fact, be regenerated and washed, dried and replaced every two years. A few simple, minor precautions are all it takes to keep your hood hygienic and working efficient over time.

(*) Always check how to wash the filter in the product instruction booklet

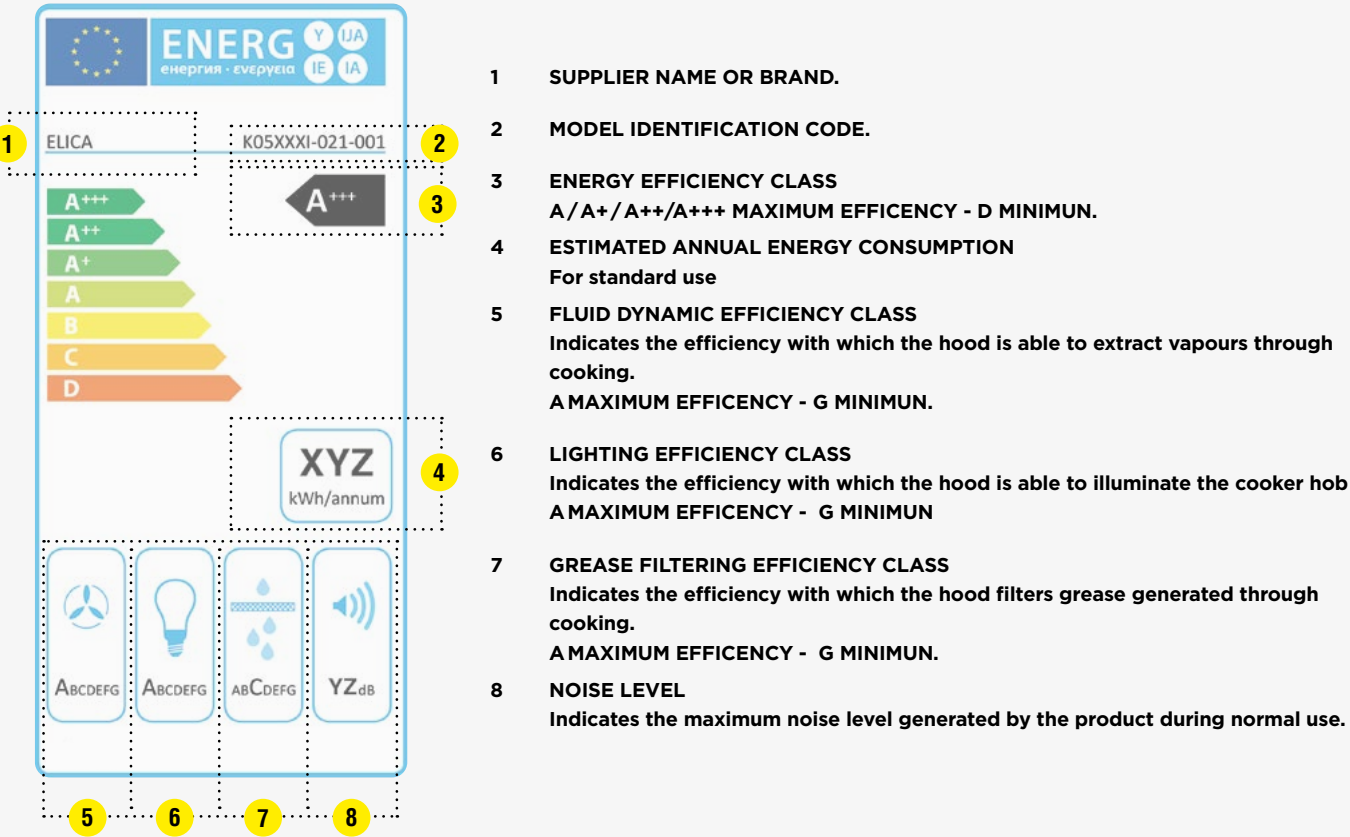

ENERGY LABEL

The Energy Label constitutes a fundamental tool for choosing the most suitable extractor hood for the user’s needs. The label provides instant information on energy consumption and the level of efficiency of the product’s performances.

Each page of our catalogue contains a symbol indicating the energy class of the product presented.

For obtaining detailed information on each version of the desired model, including all the parameters appearing on the energy label, proceed as follows:

- Identify the **product code** of the relevant model
- Visit the website **www.elica.com** and go to the DOWNLOADS section of the ASSISTANCE page, insert the product code in the search field and download the PDF document (Product Fiche) listing all the product characteristics, as per EU regulations no. 65/2014 and 66/2014.
